United Sovereign Americans Files Lawsuit Against Michigan Election Officials

SEPTEMBER 2, 2024

Amidst fears that noncitizens will impact the electoral outcome of 2024 races nationwide, United Sovereign Americans has filed suit against Michigan Secretary of State Jocelyn Benson, alleging that she failed to verify the authenticity of at least 57,978,855 facially invalid voter data records, regardless of citizenship status, and authorized at least 369,107 potentially illegal votes from questionable registrants in the 2022 general election. Also named as defendant is Attorney General Dana Nessel, who Plaintiffs allege has failed to enforce state laws that would have prevented this civil rights injury to all qualified Michigan voters, and US Attorney General Merrick Garland, who has failed to enforce federal law. Petitioners assert these officials did not provide a legally reliable election in the 2022 general election, according to the standards set by the United States Congress.

In the Help America Vote Act, Congress set a maximum error rate for a reliable federal election of 1 in 10,000,000 *ballot positions* (though Petitioners here have used the more Respondent-friendly number of 1 in 500,000 to make the point even more clear). This number translates into 1 out of 125,000 *ballots* in error permitted by law. A ballot position is a circle on a ballot. After careful analysis of Michigan official state records regarding the 2022 midterm, that accuracy requirement appears to have been ignored. Plaintiffs allege that Michigan state officials counted 17,973 more votes than their raw data records show voters having voted. Meanwhile Michigan state officials counted 3,168 more votes than the county Poll Book records show voters having voted. In addition, Michigan state officials counted 14,058 more votes than their "Official" list of voters records show having voted. In a reliable election, there would have been no more than 36 errors statewide.

Joining United Sovereign Americans are Michigan Fair Elections Institute, Timothy Mauro-Vetter, Braden Giacobazzi, Phani Mantravadi, Philip O'Hallorin, Donna Brandenburg, and Nick Somberg. Representing the plaintiffs is Bruce L. Castor, Jr. of van der Veen, Hartshorn, Levin & Lindheim. They argue that, "While Petitioners cannot state with certainty that the 2022 Michigan General Election produced "winning" candidates who should not have won, Petitioners believe and therefore aver that Michigan officials cannot state with certainty that all "winning" candidates received more votes than the "losing" candidates because the election itself was compromised by the State's failure to conform to the requirements of federal law designed to ensure reliable election results."

Petitioners have made numerous attempts to inform state officials of this problem, yet Defendants and their respective offices remain unwilling to examine evidence and bring the Michigan voting system into compliance. The Mandamus action seeks a court order that the 2024 election be conducted according to all applicable constitutional, federal, and state laws protecting the fundamental right of every American to choose representatives in a fairly and honestly conducted election.

States have a dual responsibility under the United States Constitution to protect against denial of the vote, and dilution of valid votes with invalid ballots procured by corruption. In the presence of uncertainty, the law presumes fraud and the State of Michigan must produce records proving accuracy. Defendants have been unwilling to do so. The concern Plaintiffs raise is that the civil rights harm sustained by every qualified Michigan voter in 2022, absent intervention by the court, will occur again in 2024 and subsequent federal elections. When a state fails to protect voting rights, federal apportionment can be reduced. While the State of Michigan prefers everyone to believe these are "innocent" mistakes, the law requires investigation before certifying results.
