

We the People

**UNITED
SOVEREIGN
AMERICANS**

Marly Hornik, USA CEO

In July of 2021, Marly Hornik founded New York Citizens Audit, a team of volunteer citizen investigators assembled to audit official records of New York's 2020 general election. Eventually onboarding over 2,000 New Yorkers from every profession and corner of the state, this extraordinary team launched a full-scale investigation into the NYSVoter database and the millions of potential crimes uncovered therein, as defined by the United States Department of Justice. Publishing several seminal papers linking prima facie voting system error to identity theft, civil rights, and the originalist legal meaning of elections in America, NYCA laid the foundation for election validity now being extended nationally through United Sovereign Americans. A lawfare investigation into NYCA canvassing activity by NY Attorney General Letitia James in August of 2023 stands as a testament to the incredible effectiveness of the 600+ formal presentations of NYCA evidence made in public forums in every part of New York, including town board meetings, county legislative meetings, sheriff departments, civic clubs, and more.

As the Executive Director of NYCA, Ms. Hornik led the team through the discovery and investigation of the hidden structure of registration records inside NYSVoter. This evidence was presented by NYCA to the New York State Police Special Investigations Unit, which passed the investigation to the Foreign Intelligence Taskforce of the FBI. Additional presentations were made to the bicameral NYS Legislature Election law Committees, and at The Pit, True the Vote's national event in August 2022, initiating the collaboration between NYCA and Harry Haury. The work was peer-reviewed and published in the scientific cyber-intelligence Journal of Information Warfare, May 2023.

Realizing that a national effort was needed to secure our elections, Ms. Hornik co-founded United Sovereign Americans with Mr. Haury. Ms. Hornik has tirelessly provided clarity in illustrating how the findings of USA volunteers—massive irregularities in the voter rolls, discrepancies in the vote count, suspected illegal editing of voter records, and indications of an apparent algorithmic manipulation of many state voter rolls in the US—violate federal and state law. Her leadership has been pivotal in turning those findings into evidence for federal civil rights lawsuits, and training leaders all over the country.

Ms. Hornik continues her work through USA as an educator, strategist, and inspiration to Americans everywhere. Her articles about election validity have been published by *Center Square*, *Blaze*, *American Greatness*, *TownHall*, *American Thinker*, and more. Ms. Hornik delivered the Lincoln address in 2023 to the oldest Republican club in America, in Queens, NY. She was honored by the Phyllis Schlafly Eagles organization in the Fall of 2024. Her many interviews and weekly public study sessions have helped thousands of Americans better understand the significance of real voters, real votes, real counts and real proof in securing real representation and REAL AMERICA.
