DATE: April 10, 2025

ST. LOUIS, MO – United Sovereign Americans (USA) is the first organization to **MEASURE** current election fraud **as defined by criminal law**, and the **ONLY** organization with the credentials and the **SOLUTION** to secure our elections **comprehensively**.

USA data experts, using a unique and copyrighted process, have extracted over **40 million probable felonies** from official records. These violations encompass registration fraud, voting fraud, and certification of false returns, all defined civil rights crimes under federal law. Using this law enforcement compliant evidence, USA filed nine federal lawsuits in 2024, tearing the band-aid off the colossal failure of state election officials to administer valid elections.

Iron Sharpens Iron

The USA Data Team is comprised of 94 professionals with more than 740 years of combined professional experience, from 15 states, whose backgrounds span computer science, operations management, software development, auditing and accredited accounting, cloud computing, machine learning, and cyberintelligence. Collectively, they hold more than a dozen U.S. patents and have worked for organizations ranging from NASA and NORAD to Amazon, Barclays Capital, Raytheon, and the EPA.

All USA outputs and reports are subjected to rigorous internal peer-review prior to publication guaranteeing trustworthy, scientifically sound analysis.

USA Chairman Harry Haury, who spent over 25 years in high-security workflow automation, information assurance, and cybersecurity for sensitive branches of the U.S. government, is the hands-on architect and final signatory on all of USA's data operations.

Mr. Haury has designed secure systems for the NSA, CIA, Department of Defense, Homeland Security, and numerous Fortune 500 companies—including VISA, MasterCard, and 16 of the 25 largest U.S. banks, and has built systems that manage over 30 billion workflow transactions per hour. He played a key role in improving the election infrastructure for St. Louis County, Missouri. His experience spans the Integrated Public Alert and Warning System, White House communications, and continuity of government operations. His work is trusted at the highest levels of national security.

"This is the largest election data analysis team in the nation," Haury notes. "All data professionals. The quality and rigor of our analysis is unmatched."

The Real Solution to the Election Crisis

USA was formed to fill a critical gap—actually **solving** the national election validity disaster. Don't be fooled by political scientists and others claiming to have the credentials to solve the crisis. The problem isn't simply a voter roll list maintenance or machine issue.

USA's law enforcement compliant evidence provides a complete predicate under the US Constitution, federal law and extensive Supreme Court precedence to authorize emergency actions securing the 2026 election, passing durable federal law, and prosecuting election crimes, one of the directives in the Executive Order signed by President Trump on March 25, 2025.

A Love of Country vs. A Passion for Money

The USA "DOGE of Elections" team has willingly donated their personal time and professional talents to produce tens of millions of dollars' worth of forensic analytics and thousands of hours of advocacy outreach in US Congress, 11 state legislatures and 600 community boards, raise money, file a tsunami of federal lawsuits, and educate the public about election law. They aren't seeking accolades or profit for these endeavors. They have put their own self-interests aside and banded together with the sole purpose of restoring legitimate representative government through legally valid elections. USA's law enforcement compliant evidence and comprehensive solution is being used to secure national and individual sovereignty, including accountability for state actors who defy our US Constitution.
