FOR IMMEDIATE RELEASE

Nearly 15% of Ballots in Illinois and Texas are Haunted by Phantom Voters

DATE: October 27, 2025

DALLAS, TX & CHICAGO, IL —As Halloween approaches, Unite4Freedom (U4F) continues to shine a light where shadows often fall with the release of two new non-partisan reports examining voters in the 2024 election in Illinois and Texas. While the states differ in politics and geography, Unite4Freedom's (U4F) Phantom Voter Reports share an eerily similar outcome.

In the 2024 general election, 14.9% of voters in Cook, Dupage, Kane and Winnebago Counties in Illinois, and 14.2% of voters in Dallas, Harris, Travis and Tarrant Counties in Texas, are “phantoms”— either nonexistent or ineligible under the law. That translates to nearly one million inadmissible ballots in those eight counties—a frightening number—that fall short of federal admissibility standards.

Using the same resources available to banks, courts, and law enforcement, the U4F study determined that these voters had virtually no other footprints in their respective counties beyond casting a ballot in the 2024 election.

This work isn't about red or blue—it's about transparency and truth. Whether you live in the Heartland or the Hill Country, trust in the electoral process matters to every American. Every legitimate voter deserves to have confidence that her or his voice isn't diluted by phantoms in the system.

Unite4Freedom calls on the Secretaries of State in Illinois and Texas to immediately:

- Release complete 2024 voter-record data for independent review.
- Suspend unverifiable registrations until third-party audits confirm eligibility.
- Adopt continuous identity verification standards before 2026.

Unite4Freedom also urges citizens in Illinois and Texas to help exorcise the phantoms from their elections by helping us share the truth and demand reform.

The Illinois and Texas Reports follow a series of Phantom Voter Reports that were released by U4F last week. To view all the reports, visit unite4freedom.com/phantom-voter-reports.

★★★

Unite4Freedom is a non-partisan, civic organization committed to safeguarding the right of every American citizen to legitimate representative government through legally valid elections. Active in more than 30 states, U4F drives forensic audits, educational initiatives, and policy advocacy to ensure Real Voters, Real Votes, Real Counts, Real Proof, and Real Security. Cook, Dupage, Kane, and Winnebago Counties, IL 2024 Phantom Voter Report

This study measures suspected fraudulent registration and voting in the 2024 election in Cook, Dupage, Kane, and Winnebago Counties, IL. The study was conducted using the Unite4Freedom copywritten process for performing comprehensive identity verification using commercially available fraud-prevention tools.

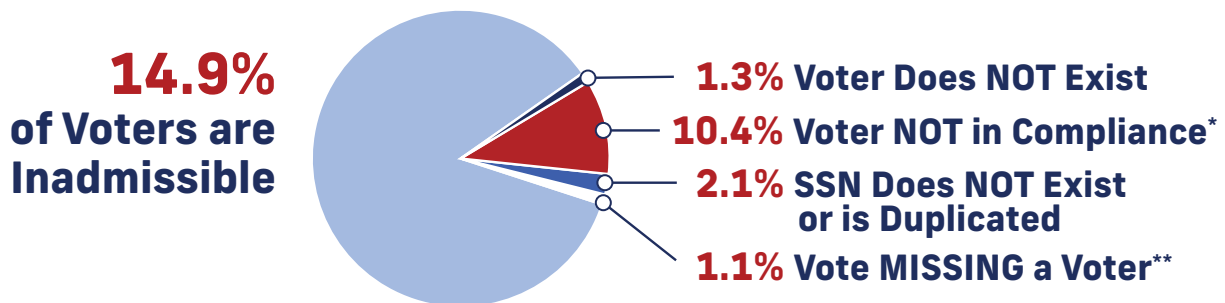

A randomized sample of 609 voter records, taken from the entire population of 2,921,366 voters in the 2024 election, was generated based on a 90% confidence interval, a precision of 0.02 and a predicted prevalence of $P = 0.1$.

The first check of the data is to see if the voter "exists" in any of the identity verification databases used and if there are address or other compliance issues. Only the people who pass the first check are run through the SSN check. Identities that fail one of the checks are not run through additional checks to ensure they are not "double counted."

When extrapolating the sample results to the population of vote records in the 2024 election in Cook, Dupage, Kane, and Winnebago Counties, IL, the following was found:

Total Votes Certified	Voter Does NOT Exist	Voter NOT in Compliance*	SSN Does NOT Exist or Is Duplicated	Vote MISSING a Voter**
2,921,366	38,376	302,210	62,361	33,368

TOTAL INCONCLUSIVE VOTERS: **436,315**
PERCENTAGE OF VOTES THAT WERE INADMISSIBLE: **14.9%**

Credentialed programmers and cybersecurity and election experts conducted the analysis using official state and county records received from their custodians. A private investigative firm assisted, producing law enforcement compliant evidence of suspected illegal voting and election misconduct.

*** Voter Not In Compliance:** Records were found to have deficiencies, including being outside the election window, meaning if they have any documented affiliation with the address provided, it does not match the timing of the election, or the address is unverifiable meaning either the address itself is not valid (meaning there is no such place—no building with the address in question) or there is no record of the person in question ever being associated with the address—in any government database.

****Vote Missing a Voter:** The difference between the certified total ballots cast in the counties according to official Illinois state certified election results, versus the number of votes appearing in an official copy of the Illinois Voter database provided by the IL SBOE, received on January 24, 2025.

Dallas, Harris, Tarrant, and Travis Counties, TX

2024 Phantom Voter Report

This study measures suspected fraudulent registration and voting in the 2024 election in Dallas, Harris, Tarrant, and Travis Counties in Texas. The study was conducted using the Unite4Freedom copywritten process for performing comprehensive identity verification using commercially available fraud-prevention tools.

A randomized sample of 608 voter records, taken from the entire population of 3,811,944 voters in the 2024 election, was generated based on a 90% confidence interval, a precision of 0.02 and a predicted prevalence of $P = 0.1$.

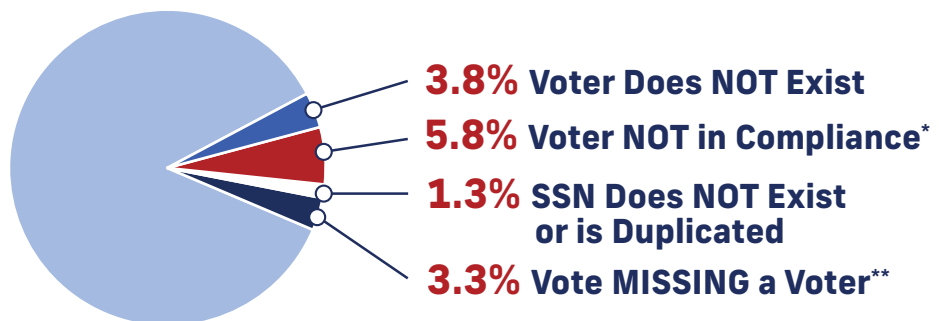

The first check of the data is to see if the voter "exists" in any of the identity verification databases used and if there are address or other compliance issues. Only the people who pass the first check are run through the SSN check. Identities that fail one of the checks are not run through additional checks to ensure they are not "double counted."

When extrapolating the sample results to the population of vote records in the 2024 election in Dallas, Harris, Tarrant, and Travis Counties in Texas, the following was found:

Total Votes Certified	Voter Does NOT Exist	Voter NOT in Compliance*	SSN Does NOT Exist or Is Duplicated	Vote MISSING a Voter**
3,811,944	144,202	219,438	50,157	126,869

TOTAL INCONCLUSIVE VOTES: **540,666**
PERCENTAGE OF VOTES THAT WERE INADMISSIBLE: **14.2%**

14.2%
of Voters are
Inadmissible

Credentialed programmers and cybersecurity and election experts conducted the analysis using official state and county records received from their custodians. A private investigative firm assisted, producing law enforcement compliant evidence of suspected illegal voting and election misconduct.

** **Voter Not In Compliance:** Records were found to have deficiencies, including being outside the election window, meaning if they have any documented affiliation with the address provided, it does not match the timing of the election, or the address is unverifiable meaning either the address itself is not valid (meaning there is no such place—no building with the address in question) or there is no record of the person in question ever being associated with the address—in any government database.*

*****Vote Missing a Voter:** The difference between the certified total ballots cast according to Texas official certified election results, versus the number of votes appearing in an official copy of the Texas voter database provided by TX SOS from December 2024.*
