

# Phantom Voter Report: 2022 General Election

**PERCENTAGE OF VOTES PROHIBITED BY LAW: ..... 21.6%**

“Voter Does Not Exist” and “Address is Invalid” use a randomized statistically powerful and valid prevalence study to establish the level of suspected election fraud and election misconduct. This is not accusing anyone in particular of a crime, in fact, it appears to be systemic, not individual actions. But it is clear evidence of a nationwide attack on the validity of our elections.

“Vote to Voter Discrepancy” is a direct measurement of the difference between the count of particular voters officially recorded as having voted and the number of votes reported as counted.
