

Election Reality:

A National Security Critical Infrastructure Emergency

The election process must protect the right of US citizens to choose representatives through a secure and legally compliant process that ensures the authenticity of the voters, votes, counts and proof.

Unite4Freedom credentialed investigators deeply analyzed over 30 states' official records regarding 2020, 2022 and 2024 congressional elections*. Thousands, and in some instances millions of votes in each state, certified as accurate by election officials, originate from records that call into question the voter's identity and eligibility under *defined criminal law*. Further research shows as many as 9% of voters simply don't exist.

Dozens of successful attacks on our election systems were exposed, that are not addressed just by cleaning the voter rolls or eliminating machines. Federal election security mandates under Voting Rights Act (VRA), National Voter Registration Act (NVRA), Help America Vote Act (HAVA), and Federal Information Security Modernization Act (FISMA) have been waived or ignored for years, resulting in fully penetrated voting systems.

THIS IS A NATIONAL SECURITY EMERGENCY.

CRITICAL VOTING SYSTEM CONTROLS HAVE FAILED, MASSIVELY:

<p>30+ MILLION "Material omissions & errors" in voter registrations**</p>	<p>20+ MILLION Votes attributed to Voters registered with "Material omissions & errors"***</p>	<p>8.5 MILLION Votes counted from non-existent Voters</p>	<p>8+ MILLION Votes edited AFTER elections were certified, altering a historic federal record</p>
<ul style="list-style-type: none"> ▶ 3 million voters in Illinois "voted" before registering to vote. ▶ 96k "voters" in Connecticut are at least 146 years old; 73k of them voted in 2024. 	<ul style="list-style-type: none"> ▶ 2.8 million Votes counted in California 2024 general election are backdated. ▶ 36k Votes counted in Massachusetts 2024 are from Voters registered at or before birth. 	<ul style="list-style-type: none"> ▶ 338k more Votes counted than Voters who voted in New York 2020. ▶ 477k "Voters" whose votes were counted in Pennsylvania 2022 do not exist. 	<ul style="list-style-type: none"> ▶ 1.5 million Votes in 2022 election added or deleted from Ohio records after certification. ▶ 223k Double Votes added to NY 2020 election, in 2023.

- ▶ **Actual election results are unknowable in entire states**, an outright fraud on the American people and the sovereignty of our nation.
- ▶ **States are illegally certifying uncontrolled election returns**, knowingly or not.

Unite4Freedom experts have detailed comprehensive measures to secure elections immediately and that the elections in 2026 and beyond accurately count all valid votes.

* Documents reviewed: Official Statewide Voter Rolls and Voting History Records, Official Results
 Secondary analysis: Unite4Freedom cross-referenced three law enforcement ID verification tools, under the control of a qualified private investigator, to measure fictitious Voters and Votes
